

1. Color differentiation of ultrasonic sensor caps from far distance

The color of ultrasonic sensor caps should be controlled from a distance of 450mm. For this purpose a color type **SPECTRO-3-500-COF-d12.0-CL** is used. The angle between the optical axis of the sensor and the symmetrical axis of the ultrasonic sensor is around 10°. The ultrasonic sensor caps can be proper differentiated as shown in the screen shots.
