N°675 SPECTRO-3 series

1. Color differentiation of loudspeaker covers

Loudspeaker covers should be color differentiated. For this purpose, a color sensor type **SPECTRO-3-30-POL** is used. At this, the distance of the sensor to the loud speaker is approximately 45mm and the detecting area at this distance is around 15mm in diameter. The loudspeaker covers can be proper differentiated as shown in the screen shots.
