

1. Color sensor with M12 8-pin connector, five digital outputs and one digital input: the SLE series

The SLE sensors type **SPECTRO-3-DIL-SLE**, **SPECTRO-3-FCL-SLE**, **SPECTRO-3-POL-SLE** and **SPECTRO-3-UV-SLE** come with five digital outputs and one digital input. The sensor can be parameterized with the windows® - software **SPECTRO3-SLE Scope V1.0** or the **SPECTRO3-COMFORT V1.0**. Up to 64 colors can be taught and 31 color groups are available at the digital outputs.
