

1. Laser displacement sensor with a high working distance: L-LAS-LT-1200-XL

The laser displacement sensor type **L-LAS-LT-1200-XL** comes with a working distance starting from approximately 800mm and goes to 1400mm. At this, the resolution is around 0.1mm and the repeatability roughly 0.4mm. The sensor can be used even on very dark objects.
