

1. Color sensor with a 4-pin M8 connector, two digital outputs and an optical fiber interface for plastic fibers: SPECTRO-3-POF-SL

The color sensor **SPECTRO-3-POF-SL** comes with a 4-pin M8 connector and two digital outputs. Furthermore, the sensor is equipped with an optical connector for standard plastic fibers with an outer diameter of 2.2mm. Thus, a huge program of frontends is available.
