

1. Two channel optical fiber sensor type SPECTRO-2-FIO-(IR2/IR)/(IR3/IR)

The two channel optical fiber sensor type **SPECTRO-2-FIO-(IR2/IR)/(IR3/IR)** comes with two different infrared LEDs (center wavelength 950nm and 1450nm) and two photodiodes with a detecting range starting from 900nm up to 1700nm). The sensor can be used especially if the moisture of different objects has to be controlled and measured.
