

### 1. Color measurement sensor type SPECTRO-3-FIO-ANA-LEDCON

The color measurement sensor **SPECTRO-3-FIO-ANA-LEDCON** in connection with an optical fiber **R-S-R2.1-(6x1)-1200-67°** can be used to measure the color e.g. of light bars, used in the automotive interior field. At this, even weak PWM LED light can be measured, the sensor delivers even  $L^*u^*v^*$  values.
