

1. Optical frontend KL-52-XL-A3.0

The optical frontend type **KL-52-XL-A3.0** will be used in connection with the optical fiber reflective type **R-S-A3.0-...** as well as the optical fiber through beam type **D-S-A3.0-...** for applications which requires a small light spot directed onto dark objects at big distance. The frontend enables applications starting from a minimal distance of 80mm up to 500mm.
