

### 1. Color sensor SPECTRO-3-SLU-SA-ANA with external light unit SI-SLU-16-DIF

The color sensor **SPECTRO-3-SLU-SA-ANA** can be used in connection with an external light unit **SI-SLU-16-DIF** which comes with a diffuser in front of the warm white light LEDs. Thus, the system can be used for example to control coatings on glass in the through beam as well as in the reflective way. The diffuser has a diameter of approximately 28mm and the aperture at the receiver side is around 7mm in diameter.
