

1. Color sensor SPECTRO-3-SLU-SA-ANA with side light unit SI-SLU-16-DIF-WWB

The color sensor **SPECTRO-3-SLU-SA-ANA** can be used in connection with the external light source type **SI-SLU-16-DIF-WWB** which comes with a diffuser in front of a combination of warm-white LEDs and deep blue LEDs. The emitted diffuse light is similar to a typical daylight wavelength distribution D65. The size of the diffuser is approximately 28mm in diameter and the aperture at the receiver side is around 7mm in diameter.
